## EXPERIENCE

### UI/UX Designer · Humble Coders

Jun 2025 – Aug 2025

- Owned UI/UX design for two client products, a jewellery brand and a dating app; delivered high-fidelity screens, user flows, and interaction specs; collaborated with developers through handoff and implementation.
- Sole designer for the Humble Solutions landing page; defined information hierarchy, layout, and visual design.
- Led product and packaging design for AttendX, the firm's flagship smart-attendance device; defined the visual language, designed packaging layouts, and worked with engineering to align physical and digital touchpoints.

### UI/UX Design Intern · Venture Lab, TIET

Jun 2024 – Aug 2024

- Designed the full UX for a dock-based campus bicycle-sharing app: 25+ user interviews across 3 campuses, 200+ surveys, synthesized into personas, journey maps, IA, and delivered validated interactive prototypes.
- Created brand identity and a component-based design system (logo, colour, typography, iconography) for scalability across rider, dock-management, and admin interfaces.
- Iterated on key decisions through testing: added QR scanning timeout to prevent indefinite reservations; surfaced CO2 savings with tree-planting equivalency in ride details to drive engagement. Project Link- [\[Project Velo\]](#)

### Design Intern · Bee's Honey

Jun 2023 – Aug 2023

- Designed 15+ marketing assets; maintained brand consistency across social, packaging, and promotional materials.

### Design Coordinator · SAATHI NGO

2022 – 2023

- Created designs for awareness campaigns: social templates, initiative logos, and video content for YouTube.

## SELECTED PROJECTS

### PawNet · Hyperlocal Animal Emergency & Reunification Platform

[\[View Project\]](#)

- Identified coordination breakdowns in animal rescue workflows currently reliant on WhatsApp.
- Built across 5 user personas; enabled fast reporting for bystanders and location-based push alerts for rescuers, real-time case assignment and step-wise status updates ensuring every report had a traceable outcome.

### MenuScript · AI-Native Meal Planning & Nutrition Platform

[\[View Project\]](#)

- Led UX and visual system design for an AI-native meal planning web app; defined IA, user flows, and high-fidelity interfaces to build a cohesive and scalable experience; currently in development, launching June 2026.

### Zynema · OTT Platform Redesign

[\[View Project\]](#)

- Researched content discoverability challenges across OTT platforms; redesigned core browse flows enabling ~70% more users to find relevant content independently during usability testing.

### Mira AI · Personal AI Assistant App

- Designed a productivity-focused behaviour-adaptive AI assistant with voice-first input and explicit feedback loops, tailored to individual user behaviour; incorporated voice interactions and behaviour-driven patterns.

## EDUCATION

### Thapar Institute of Engineering and Technology, Patiala, Punjab

Aug 2023 – May 2027

B.E. Electronics, Instrumentation & Control

## ACCOMPLISHMENTS

### IIT Guwahati UDGM'25-

2nd Runner-up | DFrame Hackathon | 2025

### TIET ACM Flamingo Hackathon

Winner — Best UX Design Award | 2025

### Chandigarh University

TechInvent Android Challenge 2025 | 1st Runner-up

## SKILLS

### Product & Design

UX Design · Interaction Design · Information Architecture · User Flows · Wireframing · High-Fidelity Prototyping · Usability Testing

### Tools

Figma · Framer · Procreate · Claude Code · Cursor · n8n · LindyAI · Vercel

### Technical

C++ · HTML · CSS · JavaScript · OOP · SQL
